1800+

AI Projects built
by students

✓ UNESCO AI Competency Framework

✓ National Education Policy 2020

✓ India AI Mission Aligned

✓ Mentors from IITs

✓ 2 International Award Winner

CHOOSE Wasabi

ATTENTION SCHOOLS!

Lead the AI Education Movement

- NEP 2020 aligned, zero infrastructure needed
- Position your school as an innovation leader
- National recognition opportunities
- Measurable students' learning outcomes in just few days

DEAR PARENTS,

Your child will not be left behind

- Your child will learn faster and be smarter than most kids their age by leveraging AI.
- They will not be trend seekers but builders
- Child Friendly, Ethical and Responsible Use of AI
- Academic performance boost through smarter study methods
- Safe, guided learning with industry mentors
- Subsidised pricing through school partnership

HELLO STUDENTS..

This is your chance to be amazing

- Build things you can actually show, not just talk about
- Stand out in college applications with AI portfolio
- Learn how to stand out when everyone has the same tools
- Join 1,000+ student builders nationwide

ENTREPRENEURS FROM WASABI

Class 12. **No tech background.** Just curiosity.
Sarthak Tripathi from Bhadohi turned an idea into **AI Margdarshak**,
a travel app.

THE WASABI WINNERS

Keshav Kansal
COHORT 1 – WINNER

Aliya Gupta
COHORT 1 – WINNER

Anvi Bindal
COHORT 1 – WINNER

FAQ for students

1. Do I need to know coding to join?

Not at all. Most students start from zero.

We don't teach coding first — we teach you how to think, build, and create with AI.

2. Will this be too hard for me?

No. It's designed for beginners.

You'll start simple and quickly move to building things you didn't think were possible.

3. What will I actually build?

Real things — Not assignments. Not theory.

Chatbots, websites, AI tools, and projects you can actually show to others.

4. How is this different from YouTube or free tools?

Because watching $\neq$ building.

Here, you build, compete, present, and win

5. What if I get stuck or don't understand something?

You will. Everyone does. That's where mentors + community come in — you won't figure it out alone.

6. What do I get at the end of this?

Not just a certificate — You leave with skills, confidence, and real projects that most students don't have.

7. Will I be ahead of other students after this?

Yes. While most are still figuring AI out, you'll already be building with it.

8. Will this help me stand out in college applications?

100%. You'll have real work to show — not just marks

9. How much is the registration fee?

It is super affordable – INR 499. For a cost of coffee, your child becomes AI-future ready.

**The future won't wait.
Neither should you**
