INDIA IS NOT PREPARING FOR AI. INDIA IS ALREADY MOVING.

“ Some people see fear in AI, but India sees
fortune & future in AI.

– Narendra Modi
Prime Minister of India

#startupindia

At the state level, under **CM Yogi Adityanath**,
initiatives like **AI Pragya Uttar Pradesh** are
already scaling AI capability over 1 million youth.

These missions are not just about technology infrastructure.
They are about building human capability. Because AI
leadership will not be defined by access to tools – but by
how early, how deeply, and how widely a generation is
prepared to build with them.

“ THE FUTURE WILL NOT BE
DEFINED BY ACCESS TO AI.
IT WILL BE DEFINED BY WHO
CAN BUILD WITH IT. ”

A CITY-LEVEL MOVEMENT
ALIGNED WITH INDIA'S AI FUTURE.

India is becoming an
AI Nation...

BUT HOW DOES THAT VISION ACTUALLY REACH A **14-YEAR-OLD STUDENT** SITTING IN A CLASSROOM IN KANPUR

KANPUR IS A **CITY OF BUILDERS.**

Engineers. Founders.
Institutions. Industry.

BUT THE NEXT WAVE WILL **NOT BE BUILT WITH FACTORIES**

Hundreds of schools. Lakhs of
students. Almost no structured
exposure to building with AI.

THE GAP IS NOT TECHNOLOGY. **THE GAP IS CAPABILITY.**

AI awareness exists. The skill to build
with it does not.

AI BUILDERS

MAY ALREADY BE SITTING INSIDE
KANPUR'S CLASSROOMS.

AND THIS IS
WHERE

IT BEGINS.
